OPERATION OF MR HANDSFREE GENIUS.....6

TROUBLE-SHOOTING 7

MAINTENANCE.....9

Dear mr Handsfree Genius owner,

Congratulations on your purchase of one of the most sophisticated and easy to use car kits! This model provides you with the highest quality full-duplex voice communication. Now you can enjoy the safest telephone conversations in your car without any inconveniences.

WHAT DOES MR HANDSFREE GENIUS INCLUDE?

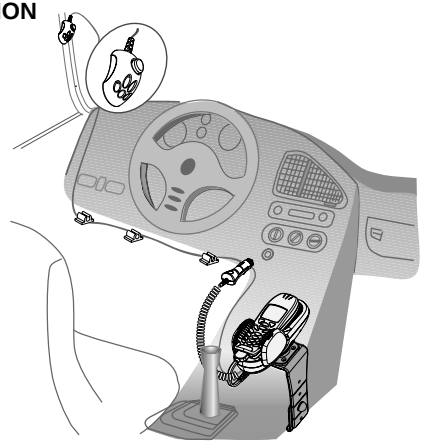
1. Main Unit with built-in speaker.
2. TALK mode LED indicators.
3. Buttons for releasing the Main Unit from the Main unit holder.
4. Holder for Mobile phone.
5. Button to release the cramps of the Holder.
6. Main unit holder.
7. Microphone jack.
8. Power adapter for cigarette plug:
   8.1. Curled cord.
   8.2. Removable fuse.
9. LED indicator of Power Adapter.
10. Mounting bracket.
11. Long screws (15mm) for fastening the Mounting Unit to the dashboard of your car.
12. Microphone.
13. Button for microphone sensitivity.
14. Clips for guiding the microphone cord.
15. Adapter for connection to car power supply and Mute cord of Car Radio (CRM).
16. Contact clips for connecting the cords.
17. Connector for connecting Mobile Phone to the Main Unit (not included).
18. Screw driver.

INSTALLATION

MOUNTING MR HANDSFREE GENIUS

- Select the place where you want to install the Genius main unit. The place for the main unit has to be easily accessible for your hands, clearly visible for the phone's display and safe enough in case of accidents and for the operation of Airbags. Under no circumstances should the appliance prevent the driver from controlling or operating the car in any way.
- The mounting for the Genius main unit (this is also the phone holder) has to be done by using a mounting bracket. The Genius main unit has to be removed from the main unit holder. This holder is already screwed to the universal mounting bracket.

INSTALLATION



Mounting the Genius main unit holder

The Genius main unit can be mounted in two ways:

A. You can mount the universal mounting bracket with the supplied screws, or:

B. • Remove the universal mounting bracket from the main unit holder by unscrewing the 6 screws.
   • Screw the main unit holder to the dashboard or a bracket that is designed for your type of car.

How to fix the universal mounting bracket?

In most cars, the universal mounting bracket is placed on the right side of the gear-control console. Make sure that the mounting bracket does not block any airbags!

1. Check for a location in your car (close to the gear-control console) where the mounting bracket fits and where it is comfortable for use.
2. Make sure that the location in your car where you want to install your mr Handsfree Genius is free from dust and dirt. Remove the cover of the adhesive tape on the mounting bracket.
3. Put the upper part of the mounting bracket , with the adhesive tape, over the edge of the console. Put the lower part of the mounting bracket , with the angle, under the edge of the console.
4. Press both parts of the mounting bracket together until the face of the upper part is in a horizontal position. Insert the screw in the appropriate hole. Tighten the screw. Place the enclosed cap over the nut.
5. You have now successfully installed the universal mounting bracket.

Connecting the electrical wires for power and mute function

A. When you want to use the cigarette plug with the curled cord, you have to insert this plug in the cigarette lighter of your car.

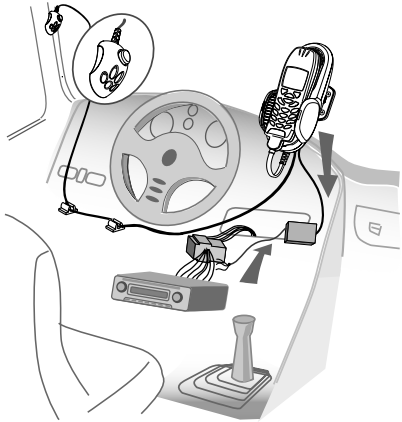
B. You can also change the curled cord of the cigarette plug into the straight cord. This way you can hide the cables easily and use the mute functions for your car radio. This mute function has to comply with the standard.
   - Unscrew the 4 screws on the main unit holder.
   - Unplug the curled cord and plug the straight cord in the socket.

   - Screw the cover plate back on the main unit holder.
   - Connect the wires of the cord with the radio by using the supplied cable connectors.
     Remark: We recommend to connect the + wire to the continuous power supply. This makes it able to use the car kit also when your engine is turned off. To prevent your car's battery from getting low, we recommend taking your phone out of the car kit when you leave the car.
   - The wires are color coded. They are listed in Table 1 and each wire should be connected to the corresponding item listed in the column B.

Table 1.

A	B
Red wire	The + voltage of the car's power supply
Black wire	The negative GND connection
Brown wire	Used for Car Radio muting (CRM) and is connected to Car Radio.

Warning: Connect only to a negative ground electrical system and a +12 Volts power system.



MICROPHONE CONNECTION

- For optimum performance, the microphone should be located at least 75 cm from the Genius main unit and 40-50 cm from the driver's mouth. Make sure that the holes of the microphone are directed towards the driver and not towards the Genius main unit.
- Place the microphone on its location using Velcro.
- Use the supplied clips to guide the microphone cord.
- Insert the microphone plug into the socket of the Genius main unit holder.
- By default, the button on the microphone is in OUT-position (unpressed position). Only for some telephones it is necessary to put the button in the ON-position.

ADJUSTMENT OF THE PHONE HOLDER

- Turn the big screw in the centre of the main unit holder to the left to make movements possible.
- Put the main unit holder in the preferred position.
- Fasten the big screw to the right to fix the main unit holder in the preferred position.

Warning: Do not move the main unit holder without unfastening the big screw. This will damage the fixation rubber inside!

CONNECTING A CONNECTOR TO THE GENIUS MAIN UNIT

- Take the Genius main unit of the Genius main unit holder.
- Connect the Genius connector to the Genius main unit.
- Place the Genius main unit back on the main unit holder.

HOW TO USE THE UNIVERSAL HOLDER?

- Release the cramps of the Genius main unit by pushing the button between the cramps.
- Put your telephone between the cramps.
- Close the cramps in a way that they hold the telephone and it therefore cannot fall.
- Take the telephone out of the holder without releasing the cramps by sliding the telephone to the top side.
- To insert the telephone, you slide it from the top side between the cramps of the Genius.
- You only have to adjust the cramps to the size of your telephone once.

CONNECTING THE PHONE TO THE CONNECTOR CABLE

- Activate the power supply to the Genius by starting the engine and connecting the cigarette plug (if applicable).
- Connect the Genius connector to the mobile phone after the power supply is activated.
- Charging function is activated now (if applicable).

Important:
During installation always make sure that the power cord is inserted into the cigarette lighter and power provided before connecting your mobile phone. The connection of your mobile phone should ALWAYS be the LAST step of complete mr Handsfree installation.

HOW TO USE THE ANTI-THEFT SYSTEM

The Genius main unit can be released from the holder. When the two buttons are pressed together, the main unit can be taken of the Genius main unit holder. This way you can remove all important electronics and avoid being robbed.

IMPORTANT!

- **Always read the 'TROUBLE-SHOOTING' chapter carefully.**
- **The mr Handsfree 'Special Brand' mobile phone connector can be obtained by mail or directly from your local supplier.**
- **Due to the 'Special Brand' mobile phone connector which can be ordered separately for each mobile phone model (Nokia, Ericsson etc.), your mr Handsfree Genius is suitable for any type of mobile phone.**

OPERATION OF MR HANDSFREE GENIUS

HOW TO SWITCH ON YOUR GENIUS WHILE USING THE CIGARETTE PLUG?

- Insert your mr Handsfree power cord into the cigarette lighter of your car to switch mr Handsfree in ON-position. Please note that for several brands of cars the engine has to be turned on before the cigarette plug is activated.
- LED indicator lights on the cigarette plug.
- To switch off, you simply plug out your power cord from the cigarette lighter.

When the Built-in cable is used, and connected to the continuous power, the Genius is always switched on.

HOW TO ANSWER A CALL?

- Answer incoming calls as normal on your mobile phone. For most phones it is possible to enable the 'auto answer' function. In this case the phone will answer the call automatically.
- You can start the conversation immediately by speaking into the microphone.
- Adapt to the appropriate speaker-volume by using your mobile phone control panel.

HOW TO PLACE A CALL?

- Dial the telephone number on your mobile phone as normal.
- You can start the conversation immediately after being connected by speaking into the microphone.

HOW TO END A CALL?

At the end of your conversation hang up your mobile phone as normal.

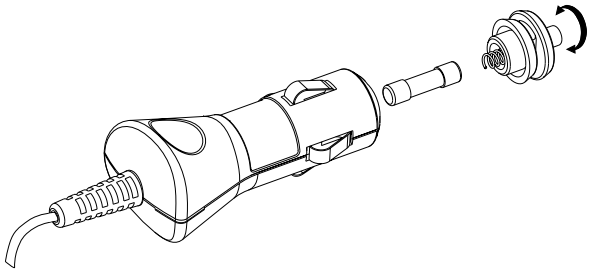
HOW TO USE VOICE DIALING?

If your telephone supports the voice dialing function, you can pronounce the name of the person you want to call after activating the voice dialing function.

TROUBLE-SHOOTING

Problem	Reason	Elimination
The device does not charge, you don't hear the caller, the caller does not hear you, and the MUTE function does not work.	There is a bad connection between the main unit and the holder.	You should remove main unit from the holder and connect it again. If you made the connection correctly, you will hear a click.
Sometimes a high-frequency noise can be heard in the car radio.	It is possible that your car radio does not have enough RF distortions protection.	Please place the mr Handsfree Genius at least 20 cm from the car radio.

Problem	Reason	Elimination
Mr Handsfree does not work. Green LED of Cigar Adapter is off.	• Cigarette lighter jack is damaged. • No contact between Power Adapter and Cigarette lighter jack. • 1.5A fuse in the Power Adapter is burned. • Power Adapter is damaged.	• Check the contact in the connection points. • Use for connection contact clips which correspond to the standard of your car or another suitable type of connection. • Replace the fuse.
Mr Handsfree Genius does not work. It is connected to Car Radio through Additional Adapter. Car Radio works.	• No contact between the wires. • Car Radio wires have smaller diameter than necessary (with cross section area less than 0.75mm^2). • 1.5A fuse in the Additional Adapter is burned.	• Check if the Cigarette lighter functions normally. • Clean the contact of the Cigarette lighter jack and the Power Adapter. • Remove the Fuse. Unscrew the nut from the Power Adapter, open the housing and take out the Fuse (Illustration p.9.) Insert new 1.5A fuse. Assemble the Power Adapter. • If items 1-3 did not help apply to a service center.
A caller does not hear you.	• The microphone is disconnected. • Microphone's cord is damaged.	• Check the connection of the microphone and the microphone jack of the Mounting unit. • Apply to a service center.
Your Mobile phone is connected to Mr Handsfree Genius but it does not work.	Telephone or connector contacts are dirty.	Clean the contacts of the telephone and connector.
Mr Handsfree Genius is connected to Car Radio but does not mute it during a call.	Car Radio Mute function needs additional settings to be activated.	Check your Car Radio User's Guide and make necessary settings.



MAINTENANCE

Please check following mr Handsfree maintenance TIPS to keep your kit in top condition:

- Do not expose the appliance to moisture.
- Always unplug the power cable when not in use.

mr Handsfree wishes you a nice and safe journey!

GUARANTEE

Mr Handsfree is a registered trademark of TE-Group NV.
The mr Handsfree brand stands for superior product quality and outstanding customer service. That is why mr Handsfree warrants this product against all defects in material and workmanship for a period of **three (3) years** from the date of original purchase of the product.
The conditions of this guarantee and the extent of responsibility of mr Handsfree under this guarantee are as follows:

- This guarantee is limited to the original purchaser of the product and is not transferable to any subsequent purchaser/ end user.
- During the guarantee period, the sole responsibility of mr Handsfree will be limited to repair or replace, at its option, any defective parts of the product if this is needed because of malfunction or failure under normal use and conditions. No charge shall be made to the customer for parts and/or repair labor.
- The product must be shipped to an authorized service center in its original and complete packaging, with transportation charges prepaid. Mr Handsfree will not assume responsibility for any losses or damages during transportation.
- To obtain repair or replacement within the terms of this guarantee, the customer must provide (a) a proof of purchase (e.g. dated bill of sale); (b) a written specification of the defect(s); (c) a return address and phone number.
- This guarantee does not cover and is void with respect to the following:
  (a) Products which have been subjected to improper installation, unauthorized repair, improper maintenance, unauthorized modifications or other acts which are not the fault of mr Handsfree; (b) Products which have been subjected to misuse, abuse, neglect, improper handling and storage, an accident or physical damage; (c) Products which have been subjected to fire, water, excessive humidity, sand, dirt, extreme changes in temperature or other conditions which are beyond the control of mr Handsfree; (d) Products which have been used with non-mr Handsfree approved accessories; (e) Products which have the serial number altered, defaced or removed; (f) Products which have been opened, altered, repaired or modified by any unauthorized service center.
- Excluded from any guarantee are consumable items which may need replacing due to normal wear and tear, such as batteries, ear cushions, decorative parts and other accessories.

This guarantee gives you specific legal rights, and you may also have other rights which vary from country to country.

If there are any problems or uncertainties, you can ask your questions through support@mrhandsfree.com.

mr Handsfree wishes you a nice and safe trip!
